DRAINAGE SYSTEMS

PRICE LIST

With effect from 01st April, 2021

STRONG AND LIGHT WEIGHT DRAINAGE SYSTEM

Astral Foamcore pipes are multilayered pipes with outer and inner layers of conventional PVC and middle layer of foamed PVC. Outer and inner layers are designed to take the load and middle layer of foamed PVC gives rigidity and maintains the shape of the pipe under load. It reduces total weight of the pipe, making it light when compared to solid wall PVC pipes. Astral Foamcore pipes distribute the load more evenly and do not show much distortion, as it has unique "I-Beam" structure. Due to its ability of absorbing the load, Astral Foamcore pipes are most suitable for underground drainage systems, where soil exerts a lot of pressure on pipe surfaces. The soil pressure can rupture the solid walled pipe after some time where Astral Foamcore pipes can withstand the same and provide longer service life.

RINGFIT PIPES

The socket has groove inside for rubber ring. The rubber ring ensures trouble free water tight joint with allowance to thermal expansion/contraction.

SELFIT PIPES

Selfit pipes are socketed on automatic socketing machine with self-socket length (without groove). Such pipes are to be joined with solvent cement.

AVAILABLE SIZES

- 11.0 cm with stiffness class SN 4 and SN 8
- 16.0 cm, 20.0 cm, 25.0 cm & 31.5 cm with stiffness classes SN 2 (SDR 51), SN 4 (SDR 41) & SN 8 (SDR 34)

FIELDS OF APPLICATIONS

Drain and sewer system in residences, commercial complexes, resorts, hospitals, academic institutes, industries etc.

FEATURES & BENEFITS

- Light weight & strong, easy to install
- Wide range & compatibility
- Maximum flow rate
- Longer service life
- Cost saving
- Chemical and corrosion resistance
- Non-toxicity, non conductor

ULTRA MODERN DRAINAGE SYSTEM

Astral Underground Drainage products are manufactured using state-of-the-art production technology which provides comprehensive range of robust, lightweight and extremely durable drainage products with unparalleled long term performance.

SPECIALLY DEVELOPED

FITTINGS ADJUSTABLE BEND

Adjustable Bends are specially designed by Astral to suit installation of inspection chambers. As the chamber inlet and outlets have fixed angle & position, adjustable bends can be changed depending on the requirement of the size. These bends are available in two different patterns, one with 02 pcs (suitable for 5° to 37.5° movement) & 03 pcs (suitable for 0° to 87.5° movement). These bends eliminate use of extra fittings and pipes to get the angle with pipeline and hence are very cost effective.

MCGM APPROVED

ACCESS AND RODDING POINTS

Access is very important on all installations for testing, inspection, and removal of any blockage or debris. Rodding in both directions can be achieved by using a 31.5 cm, 35.5 cm or 45.0 cm Large Inspection Chamber in conjunction with access fittings. Rodding points are normally used in storm water drainage systems where the rodding point is located at the head of the drain run connection to a chamber, and being no further than 22 metres away from the chamber. The rodding point should be enclosed in a concrete surround to provide support and ensure that it does not become mislaid at ground level.

AVAILABLE SIZES

Astral offers surface channel made from polypropylene and they are free from above problems caused by traditional surface channel. 11.0 cm x 1 mtr Long End. LH & RH both end caps are available.

Astral Drain Hulk 50.0 & 60.0 cm inspection chambers and 80.0 & 100.0 cm manholes are available in 5 inlet base & 3 inlet base options.

FEATURES & BENEFITS

- Great Flexibility • Perfect Hydraulic Properties
- Great Strength • Watertight System • Hygienic and Safe • Minimum Excavation Cost • Minimal Maintenance • Longer Life and economical

FIELDS OF APPLICATION

- Ring lines / Down take lines • Swimming pools
- Pipes for hand pumps • Salt water lines • Sugar and paper industries • Industrial process lines
- Aggressive / corrosive fluid transportation • Coal washing and ash handling

Astral UNDERGROUND DRAINAGE SYSTEM is ideal in single house application to multi floor buildings, hotels, hospitals, shopping malls, academic institutes upto the main lines.

INSPECTION CHAMBERS

Astral's innovative design for 31.5 cm, 35.5 cm & 45.0 cm brings unmatched flexibility to the underground drainage. The joints & seals are designed in such a way that they can accommodate the movement of connecting piece up to 3° in any direction. Astral also introduces the Drain Hulk with 50.0 cm, 60.0 cm Inspection chambers & 80.0 cm, 100.0 cm manhole for public sewer lines.

GULLIES & SURFACE CHANNEL GULLIES

A gully holds water, like a trap, to stop foul air escaping from the foul drainage system. Its purpose is to collect waste water from ground floor bathrooms, kitchens and utility rooms or rainwater from paved areas or roofs.
